Quantum Computation and Quantum Information

Samuel J. Lomonaco, Jr. and Howard E. Brandt
editors

CONTENTS

Preface ……. 1 page

List of Participants …….. 1 page

Pot de Vin Prize awarded to Gilles Brassard …… 1 page

Space Searches with a Quantum Robot ……...…….…… 12 pages
Benioff, Paul

Perturbation Theory and Numerical Modeling Quantum Logic Operations with a Large of Qubits ……...……. 29 pages
Berman, G., G.D. Doolen, D.I. Kamenev, G.V. Lopez, and V.Tsifrinovich

Inconclusive rate with a positive operator valued Measure ……... 10 pages
Brandt, Howard E.

Quantum Amplitude Amplification and Estimation …….. 30 pages
Brassard, Gilles, Peter Hoyer, Michele Mosca, and Alain Tapp

Manipulating the Entanglement of One Copy of a Two-Particle Pure Entangled State ……..……...……. 7 pages
Hardy, Lucien

Geometric Algebra in Quantum Information Processing …….. 20 pages
Havel, Timothy F., and Chris J. L. Doran

Quantum Computing and the Jones Polynomial ……...…. 38 pages
Kauffman, Louis H.

Quantum Hidden Subgroup Algorithms: Mathematical Perspective …...… 63 pages
Lomonaco, Samuel J., Jr. and Louis H. Kauffman

Improved Two Party and Multi-Party Protocols ……..…….. 10 pages
Maneva, Elitza N., and John A. Smolin

Quantum Games and Quantum Algorithms ……...…….…… 11 pages
Meyer, David A.

A Proof That Measured Data and Equations Quantum Mechanics Can Be Linked Only by Guesswork …….……. 24 pages
Myers, John M., and F. Hadi Madjid

Quantum Computation by Geometrical Means …… 6 pages
Pachos, Jiannis

Pauli Exchange and Quantum Error Correction ……..……... 12 pages
Ruskai, Mary Beth

Relative Entropy in Quantum Information Theory ……...……. 33 pages
Schumacher, Benjamin, and Michael D. Westmoreland

An Unentangled Gleason's Theorem …….……. 9 pages
Wallach, Nolan R.

Entangled chains ……..…….…….…. 12 pages
Wootters, William K.
