

Computer Science Course Survey Fall 2008

In an effort to better understand how students perceive the CS curriculum and instruction at UMBC, we have developed a program-wide course survey to be administered to students in all CS courses. The survey will be available in Blackboard from October 15 through October 31. Please log into blackboard.umbc.edu during this time frame, and complete a survey for each of the CS courses that you are enrolled in. The survey is available within each course's community under "Course Documents" (click on "CMSC Course Survey").

The results of the survey will be anonymous (blackboard will track who responds to the survey, but will not associate student names with individual responses).

Please contact the CS Undergraduate Program Director, Marie desJardins (mariedj@cs.umbc.edu, ITE 337, x53967) if you have any questions, concerns, or comments about the survey process.

Thank you for your assistance!
